**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 19 December 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

This action is in response to the election of claims 8, 10-11, filed by applicant on 12/19/03. In view of the affidavits, the rejection over Kong et al is now withdrawn.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 10, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beaumont et al (Conference article presented on July 1999).

Beaumont teaches forming GaN triangular stripes as seeds by selective epitaxy at low temperature by OMVPE (low pressure technique) and then increasing the temperature by HVPE (high pressure technique) to form continuous layer through coalescence to reduce the defect density as low as  $5 \times 10^6$  /cm<sup>2</sup> (abstract see section 0020-0021 and US 2002/015952). However, Beaumont et al does not teach first layer containing Al. Nakamura teaches AlGaIn as buffer layer as alternative GaN. It would have been obvious to one of ordinary skill in the art to use AlGaIn as alternative to GaN because using Al content as one of the precursor permits lower growth temperatures.

US patent publication by Beaumont and PCT publication is provided for detailed description.
